Subject: The Doctor's Center

To whom it may concern,

Gate Concrete Products Co. uses the services of "The Doctor's Center" for multiple reasons. In addition to the handling of company physicals and injury treatment, Gate also uses their following onsite services available for: Random Drug Screening, Respiratory Testing, and Audio Metric Exams.

All testing and exams are done professionally and the administrative requirements are handled in a timely manner. I highly recommend The Doctor's Center onsite services for any company.
